Sprint 3 Report

Actions to stop doing:

- We decided to stop attempting to calculate the distance between us and the restaurant

Actions to start doing:

- We decided to start implementing new filters to find better restaurants

Actions to keep doing:

- We decided to continue our team updates over Discord because they are good for coordinating our efforts, and having coding jams.

Work completed:

- User Story 1 (As a user I want to be able to set filters so I can get restaurants personalized to me)

 - Task 1: finish implementing settings

 - Time: 4

- User Story 2 (As a user I want to be able to swipe right and get the restaurants contact information so i can go there)

 - Task 1: finish swipe right

 - Time: 3

- User Story 3 (As a user I want a clean user interface to make a decision quickly)

 - Task 1: finish UI for main activity

 - Time: 5

Not completed:

User Story 4 (As a user I want the app to know where I am so it can find restaurants close to me)

Task 1: implement location

Time: 5

Work completion rate:

-Total number of user stories completed during the prior sprint:

3 user stories completed.

-Total number of estimated ideal work hours completed during the prior sprint:

Approx 12 ideal hours of work completed in prior sprint.

-Total number of days during the prior sprint:

3-5 ideal work days available in prior sprint.

-For the previous sprint, the user stories/day and ideal work hours/day figures should be reported.

Approx 3 user story per 5 days for Sprint 3, and 4 hours of work per day.

-For sprints past the first sprint, this section should also provide the average user stories/day and average ideal work hours/day figures computed across all sprints to date.
